Second Regular Session

SENATE

RECEIVED BY: 

S.B. No. 2482

Introduced by Senator Loren Legarda

EXPLANATORY NOTE

Presidential Decree (P.D.) No. 1308, the law regulating the practice of Environmental Planning in the Philippines, was enacted thirty (30) years ago in 1978. Many parts of this law have become obsolete because of recent developments. For example, the existing law does not address the practice of foreign Environmental Planners (EnPs) who now freely enter the country and offer/undertake various planning services.

With the emphasis of the national government and local government units (LGUs) need for various types of planning for the super-regions, regions, provinces, districts, cities, municipalities and of smaller political subdivisions, it is imperative that these planners or EnPs are duly qualified and proven competent to perform such sensitive tasks and to assume the attendant professional responsibilities and civil liabilities for their prepared, signed and sealed plans.

The proposed bill provides a more responsive and comprehensive regulation for the registration, licensing and practice of the profession of Environmental Planning in light of local and international developments in the field, which encompasses a plethora of planning concerns, i.e climate change, natural and built environments, transportation, socio-economics, public administration, gender/marginalized sectors and related concerns, subdivision planning, environmental investigation, disaster prevention/mitigation/response and the like. The bill proposes a clearer definition of the practice of Environmental Planning and the expansion of the types of academic degrees required to qualify for the licensure examination, likewise providing for continuing professional education (CPE) to make Philippine EnPs globally recognized and competitive.

In view of the foregoing, the passage of this bill is earnestly sought.
