OF THE PHILIPPINES)

SENATE
S. No. 2555

RECEIVED BY: 

Introduced by Senator Miriam Defensor Santiago

EXPLANATORY NOTE

The Constitution, Article XIV, Section 2 (3) provides that:

SEC. 12. The State shall:

x x x

(3) Establish and maintain a system of scholarship grants, student loan programs, subsidies and other incentives which shall be available to deserving students in both public and private schools, especially to the underprivileged.

Nursing has been one of the fastest rising professions in our country. Due to the increase in opportunities to work abroad, nursing graduates have steadily increased over the past few years. Fely Marilyn Lorenzo, head of the University of the Philippines' Institute of Health Policy and Development Studies, said that in 2006, 397,195 students graduated with a nursing degree, up from 296,000 in 2005.¹

Due to the increase in enrollment, our nursing education system is hard pressed to catch up with the demand. The current faculty shortage will be greatly compounded in the next few years by the retirement or migration of many of the current nurse faculty. Without sufficient nurse faculty, schools of nursing cannot expand enrollments, and the nursing shortage will continue to cripple our nation's health care delivery system.

This bill seeks to mandate the Department of Health to encourage programs that will engage the cooperation of private institutions not only in producing better nursing faculty but also in raising the level of nursing education altogether.
